Mr. G. W. Smith stated that the singing mouse, which was discovered some weeks ago in the Northern Liberties, county of Philadelphia, was in the Librarian's room, and invited the members to listen to it after the adjournment of the Society. Prof. Haldeman exhibited a specimen of a spider (*lycosa scutulata*), from which, when stuck with a pin, and in the act of dying, a parasitic worm of the genus *Filaria*, three times the length of the spider, proceeded.
